Subject Index

A and B blood group antigen expression on mixed colony cells and erythroid precursors: relevance for human allogeneic bone marrow transplantation (BLACKLOCK, KATZ, MICHALEVICZ, HAZLEHURST, DAVIES, PRENTICE & HOFFBRAND), 267.
Actin polls and actin microfilament organization in cultured human endothelial cells after exposure to thrombin (GALDAL, EVENSEN, HØGLUND & NILSEN), 617.
Adenylate cyclase activity in rat bone marrow, cytochemical localization of (KRZYSZTOFOWICZ & DABROWSKI), 411.
Anaemia, aplastic, analysis of lymphocyte subsets in patients with (ZOUMBOS, FERRIS, HSU, GOODMAN, GRIFFITH, SHARROW, HUMPHRIES, NIENHUIS & YOUNG), 95.
Anaemia, aplastic, treated with syngenic bone marrow transplantation (NATHAN), 208.
Anaemia of chronic renal failure in sheep: studies *in vitro* (MLADEMOVIC, ESCHBACH, GARCIA & ADAMSON), 491.
Anaemias, immune haemolytic, *ex vivo* antigen preparation for the serological detection of drug-dependent antibodies in (SALAMA, MUELLER-ECKHARDT, KISSEL, PRALLE & SEEGER), 525.
Antithrombin III, neonatal (PETERS, JANSEN, TEN CATE, KAHLÉ, OCKELFORD & BREEDERVELD), 579.
Aplasia, pure red cell: relationship between inhibitory activity of T cells to CFU-E and erythropoiesis (HANADA, ABE, NAKAMURA & AOKI), 107.
Aplasia, pure white cell, treated by high dose intravenous immunoglobulin (BARBUI, BASSAN, VIERO, MINETTI, COMOTTI & BUELLI), 554.
Arachidonic acid, alteration of platelet responses to metabolities of, by oral contraceptives (PAN, HALL & WU), 317.
Arachidonic acid and leukotriene B_4 induce aggregation of human peripheral blood mononuclear leucocytes *in vitro* (VILLA, COLOTTA, DE GAETANO & SEMERARO), 137.

B and T cell malignancies of childhood, differentiation and cytokinetic analyses of normal and neoplastic lymphoid cells in (HIRT, BAUMGARTNER, IMBACH, LUETHY & WAGNER), 241.
Bone marrow, human, separation of, by counterflow centrifugation monitored by DNA-flowcytometry (DE WITTE, PLAS, KOEKMAN, BLANKENBORG, SALDEN, WESSELS & HAANEN), 249.
Bone marrow transplantation, autologous (LINCH & GOLDSTONE), 1.
Bone marrow transplantation, autologous, contributes to haemopoietic recovery in children with solid tumours treated with high dose melphalan (KINGSTON, MALPAS, STILLER, PRITCHARD & MCELWAIN), 589
Bone marrow transplantation for acute lymphoblastic leukaemia (ZWAAN, HERMANS, BARRET & SPECK), 33.
Bone marrow transplantation in man, allogeneic: *in vitro* activity of FTS-Zn on T-cell markers and functions (BORDIGONI, BÉNÉ, FAURE, DONNER, JANOT, DARDENNE, DUHEILLE & OLIVE), 661.
Book reviews
Biology and Pathology of the Vessel Wall, 557.
Bone Marrow Biopsies Updated, 556.
Bone Marrow Structure and Function, 557.
T Cell Hybrids, 559.
The Endothelial Cell—A Pluripotent Control Cell of the Vessel Wall, 557.
Brain spectrin-like protein in *sph/sph* mice, normal content of (CASORIA, ZAGON, BERNSTEIN, SHOHET, MCLAUGHLIN & GOODMAN), 277.

Chromatography, CM Affi-Gel Blue, of human urine: a simple one-step procedure for obtaining erythropoietin suitable for *in vitro* erythropoietic progenitor assays (KRYSTAL, EAVES & EAVES), 533.
Cigarette smoking and platelet adhesion (PITTILO, CLARKE, HARRIS, MACKIE, ROWLES, MACHIN & WOOLF), 627.
Cobalamins, endogenous, conversion of, into microbiologically-inactive cobalamin analogues by exposure to nitrous oxide (MUIR & CHANARIN), 517.

Desferrioxamine, depletion of excessive liver iron stores with (COHEN, MARTIN & SCHWARTZ), 369.

Erythropoiesis in experimental chronic renal failure, a model for (MASON & THOMAS), 729.
Erythropoiesis *in vitro*, the effects of therapeutic dialysis and renal transplantation on uraemic serum inhibitors of (SUMMERFIELD & BELLINGHAM), 295.
Esterase positive cells, double (SCOTT, CAHILL, MORGAN & ROBERTS), 763.

Factor VIII, porcine, efficacy in the management of haemophiliacs with inhibitors (CIAVARELLA, ANTONCECCHI & RANIERI), 641.

Glutathione, transport of the S-2,4 dinitrophenyl conjugate of, from erythrocytes (BOARD), 200.

GM 58/8: a monoclonal antibody that identifies a new lineage-specific determinant expressed by myeloid progenitors (CFU-GM) and their progeny (DAS GUPTA, BRICE, YOKOCHI, PAPAYANNOPOULOU & STAMATOYANNOPOULOS), 147.

Haematin, mechanisms and characteristics of platelet activation by (NEELY, GARDNER, REYNOLDS, GREEN & TS'AO), 305.

Haemophilia A, inverse correlation between age related abnormalities of T-cell immunity and circulating thymosin α_1 levels in (KESSLER, SCHULOF, ALABASTER, GOLDSTEIN, NAYLOR, PHILLIPS, LUBAN, KELLEHER & REAMAN), 325.

Haemophilia A, the haemostatic plug in (SIXMA & VAN DEN BERG), 741.

Haemopoietic cells, human, normal and leukaemic, expression of SSEA-I antigen (3-fucosyl-*N*-acetyllactosamine) on: modulation by neuraminidase treatment (TABILIO *et al*), 697.

Haemostasis, primary, delay in, produced by a fish diet without change in local thromboxane A_2 (THORNGREN, SHAFI & BORN), 567.

Helper cells, human 'true' (Leu 3^+ 8^-), express acid alpha naphthyl acetate esterase (BERNARD), 381.

Heparin, low molecular weight heparin, and heparin analogues (THOMAS), 385.

Hodgkin's disease, acute leukaemia in patients treated for (PAPA *et al*), 43.

Hodgkin's lymphoma, therapy-induced preleukaemia in patients treated for: clinical and therapeutic relevance of sequential chromosome banding studies (GYGER, FOREST, VOUNG, PERREAULT, LAVALLEE, LACOMBE, BOILEAU & D'ANGELO), 61.

Idiopathic thrombocytopenic purpura in adults, low-dose intravenous pepsin-treated gammaglobulin for EMILIA, SACCHI, TORELI, SELLERI & TORELLI), 761.

Leukaemia, acute, fibronectin C in (REILLY, GALLOWAY, MACKIE & MCVERRY), 83.

Leukaemia, acute, in patients treated for Hodgkin's disease (PAPA *et al*), 43.

Leukaemia, acute lymphoblastic, bone marrow transplantation for (ZWAAN, HERMANS, BARRETT & SPECK), 33.

Leukaemia, acute monocytic, cytochemical and immunological characteristics of (MILLIGAN, ROBERTS, LIMBERT, JALIHAL & SCOTT), 391.

Leukaemia, acute myeloblastic, non-cardiotoxic anthracycline regimens in the treatment of (BOUGHTON, FRANKLIN, APPERLEY & KNIGHT), 378.

Leukaemia, acute myelogenous, modulatd by B_{12} deficiency: a case with bone marrow blast cell assay corroboration (AHMANN & DURIE), 91.

Leukaemia, acute myelogenous, patients with, and healthy individuals, heat production rate in polymorphonuclear granulocytes from (FÄLDT, ANKERST & MONTI), 671.

Leukaemia, acute myeloid, and carcinomatosis, simultaneous occurrence of (SHERIDAN, ELLIMS, HANCOCK & FORSTER), 199.

Leukaemia, acute myelomonoblastic, CNS involvement in (STAVEM & EVENSEN), 383.

Leukaemia, acute myelomonocytic, successful remission induction in, using low-dose cytosine arabinoside following failure of intensive chemotherapy (SUMMERFIELD), 205.

Leukaemia, acute non-lymphoblastic and atypical, the effect of low dose Ara-C in (ISHIKURA, SAWADA, OKAZAKI, MOCHIZUKI, IZUMI, YAMAGISHI & UCHINO), 9.

Leukaemia, acute non-lymphoblastic, high levels of circulating haemopoietic stem cells in very early remission from, and their collection and cryopreservation (TO, HAYLOCK, KIMBER & JUTTNER), 399.

Leukaemia, acute non-lymphocytic, assessment of the drug sensitivity of, using the *in vitro* clonogenic assay (PREISLER & AZARNIA), 633.

Leukaemia, acute non-lymphocytic, prediction of response of, to therapy with 'high dose' cytosine arabinoside (PREISLER *et al*), 19.

Leukaemia, acute, with mixed lymphoid and myeloid phenotype (CHAN *et al*), 203.

Leukaemia, B-cell chronic lymphocytic, discrepancy between phenotypic and functional features of natural killer T-lymphocytes in (FOA *et al*), 509.

Leukaemia, chronic granulocytic, in transformation, chemotherapy and autografting for: probable prolongation of survival for some patients (HAINES *et al*), 711.

Leukaemia, chronic lymphocytic, prognostic significance of chromosome abnormalities in (PITTMAN & CATOVSKY), 649.

Leukaemia, hyperleucocytic, microvascular changes in (MILLIGAN & TOOKE), 380.

Leukaemias, monocytic, serous effusions in (MUFTI, OSCIER, HAMBLIN, NIGHTINGALE & DARLOW), 547.

Leukaemia, simultaneous detection of membrane markers with monoclonal antibodies and peroxidatic activities in: ultrastructural analysis using a new method of fixation preserving the platelet peroxidase (BRETON-GORIUS, VANHAEKE, PRYZWANSKY, GUICHARD, TABILIO, VAINCHENKER & CARMEL), 447.

Leukotriene B_4 and arachidonic acid induced aggregation of human peripheral blood mononuclear leucocytes *in vitro* (VILLA, COLOTTA, DE GAETANO & SEMERARO), 137.

Lymphocytosis, chronic T cell: a review of 21 cases (NEWLAND *et al*), 433.

Lymphoma, lymphoblastic, Ph^1-positive and Ph^1-negative abnormal cell lines in a child with (SHIKANO, KANEKO, ISHIKAWA, NIIKAWA, TONO-OKA, TAKEDA & KIKUCHI), 459.

Lymphoma, non-Hodgkin's, immunohistological study of transferrin receptor expression in (PILERI, GOBBI, RIVANO & MARTINELLI), 501.

Macrophage progenitors, normal human, inhibition by retinoic acid (JANUSZEWICZ & COOPER), 119.

Megakaryoblast precursors in rodent bone marrow: specificity of acetylcholinesterase staining (LEPORE, HARRIS & PENINGTON), 473.

Megakaryocytes, normal human, isolation of (ISITAR), 465.
Monoclonal antibody specific for granulocyte-lineage cells and reactive with human pluripotent and committed haemopoietic progenitor cells (JANOWSKA-WIECZORKE, MANNONI, TURNER, MCGANN, SHAW & TURC), 159.
Monoclonal gammopathy of undetermined significance, low plasma cell 3(h) thymidine incorporation in (BOCCADORO *et al*), 689.
Monocytes direct T lymphocyte stimulation of human peripheral blood granulocyte-macrophage colony formation (HARVEY, KAISER & CLARKE), 129.
Myelodysplastic syndrome, sequential karyotypic evolutions and bone marrow aplasia preceding acute myelomonocytic transformation from (TOMONAGA, TOMONAGA, KUSANO & ICHIMARU), 53.
Myelodysplastic syndromes, bone marrow histology in. II. Prognostic value of abnormal localization of immature precursors in MDS (TRICOT, DE WOLF-PEETERS, VLIETINCK & VERWILGHEN), 217.
Myelodysplastic syndromes, low dose cytosine arabinoside in (TRICOT, DE BOCK, DEKKER, BOOGAERTS, PEETERMANS, PUNT & VERWILGHEN), 231.
Myelofibrosis, acute, low dose cytosine arabinoside used to induce remission in (WHITEHEAD & GEARY), 375.
Myelokathexis: a rare form of chronic benign granulocytopenia (BASSAN, VIERO, MINETTI, COMOTTI & BARBUI), 115.
Myeloma during plateau phase, light chain isotype associated suppression of surface immunoglobulin expression on peripheral blood lymphocytes in (WEARNE, JOSHUA & KRONENBERG), 483.
Myeloma, multiple, systemic irradiation in: a report on nineteen cases (ROSTOM, O'CATHAIL & FOLKES), 423.
Myeloma, remission phase, low plasma cell 3(H) thymidine incorporation in (BOCCADORO *et al*), 689.
Myeloma, smouldering, low plasma cell 3(H) thymidine incorporation in (BOCCADORO *et al*), 689.
Myeloproliferative disease, neutrophils with ring-shaped nuclei in (LANGENHUIJSEN), 227.
Myeloproliferative disease, patients with, and in normal subjects, measurement of platelet lifespan with indium oxine labelled platelets (BAUTISTA, BUCKLER, TOWLER, DAWSON & BENNETT), 679.
Myeloproliferative disorders, cellular mechanisms of (OGAWA), 563.
Neurohypophysis, identification of plasminogen activator releasing activity in (COLUCCI, STASSEN, SALWA & COLLEN), 337.
Neutropenia, immune, the severity of, correlates with the maturational specificity of antineutrophil antibodies (HARMON, WEITZMAN & STOSSEL), 209.

Phagocytosis, preferential, of *in vivo* aged murine red blood cells by a macrophage-like cell line (WALKER, SINGER, MORRISON & JACKSON), 259.
Plasmodium falciparum takes up iron from transferrin (POLLACK & FLEMING), 289.
Platelet autoantibodies in septicaemia (VAN DER LELIE, VAN DER PLAS-VAN DALEN & VON DEM BORNE), 755.
Preleukaemic states, natural killer-interferon system in patients with (TAKAGI, KITAGAWA, TAKEDA, MINATO, TAKAKU & MIURA), 71.
Prothrombin activation products in human urine, quantitation of (BEZEAUD & GUILLIN), 597.
Prothrombin time, falsely prolonged, due to an inhibitor to human thromboplastin (TINEGATE, MCARDLE & QURESHI), 347.

Red cell removal from donor bone marrow (JONES, LINCH, MARCUS, SINGER & GOLDSTONE), 553.
Rheumatoid arthritis, the mechanism of the anaemia in: effects of bone marrow adherent cells and of serum on *in-vitro* erythropoiesis (REID, PROUSE, BAPTISTA, GUMPEL & CHANARIN), 607.

Septicaemia, platelet autoantibodies in (VAN DER LELIE, VAN DER PLAS-VAN DALEN & VON DEM BORNE), 760.

T-cell lymphoma-leukaemia, adult, successful chemotherapy with deoxycoformycin in (DAENEN, ROJER, SMIT, HALIE & NIEWEG), 723.
Thalassaemia, an Indian $(\delta\beta)^0$, characterization of (WAINSCOAT, OLD, WOOD, TRENT & WEATHERALL), 353.
Thalassaemia, α, in Sardinian newborns (GALANELLO, MACCIONI, RUGGERI, PERSEU & CAO), 361.
Thalassaemia, β-, antenatal diagnosis of (MAGGIO & CASTELLANO), 202.
Thalassaemia minor, β-, in gypsies from the south of Spain (CABRERA & DE PABLOS), 377.
